EDUCATION

The University of Texas at Dallas

Expected Graduation: Dec 2027

Bachelor of Science in Information Technology Systems (Cybersecurity Management)

Bachelor of Science in Finance (Risk Management and Cybersecurity)

GPA: 3.65/4.00

Relevant Coursework: Network and Information Security, Cybersecurity Governance, Risk Analytics, Cybersecurity Risk Management, Programming with Python, Data Governance, Cloud Computing with AWS, Business Analytics

EXPERIENCE

Cybersecurity GRC Engineering Intern

May 2026 – August 2026

Cloudflare

Austin, TX

- Engineered a scalable GRC automation platform to intake customer security questionnaires and generate grounded responses, speeding up questionnaire processing time by **~5x**
- Developed tooling to classify questionnaire content across **SOC 2, ISO 27001**, and **NIST 800-53**, improving visibility and control mapping
- Built **agentic** workflows to triage and escalate low-confidence and incomplete questionnaire responses for review
- Collaborated with security, GRC, and engineering stakeholders to translate compliance needs into internal tooling

Cybersecurity GRC Analyst Intern

May 2025 – Aug 2025

Talen Energy

Houston, TX

- Advanced governance and compliance by integrating SailPoint IdentityNow with Okta via **SAML SSO**, automating user access reviews for **2,500+** Workday users
- Reduced phishing susceptibility by **7%** in 2 months through ZenGuide, strengthening security awareness
- Strengthened post-IPO **IT SOX compliance** by collecting and validating control evidence in ServiceNow, supporting walkthroughs, and managing documentation in Workiva

Data Analyst

Aug 2024 – Present

Dallas Formula Racing

Richardson, TX

- Analyzed, cleaned, and visualized vehicle dynamics data (CSVs, CAN Bus logs) using **Plotly** and **Pandas** to simplify metrics for engineers and support performance improvements

LEADERSHIP

Experience Officer

Jan 2025 – Present

Association for Computing Machinery (ACM)

Richardson, TX

- Leading initiatives to improve the ACM Mentor Program experience for **130+** participants through feedback systems, event coordination, and resource development

PROJECTS

Network Exposure Analysis Tool | *EC2, S3, DynamoDB, Nmap, Flask*

Mar 2025 – Apr 2025

- Built a scalable full-stack vulnerability scanner on **AWS (EC2, S3, DynamoDB)**, enabling users to initiate and monitor real-time network scans through a web interface
- Implemented **Nmap** for asynchronous scanning, identifying open ports to enhance security insights
- Developed a Flask API with Gunicorn and Nginx, using *systemd* for background management and high reliability

Productivity Analytics Platform | *Python, Next.js, Redis, OpenVINO*

Nov 2024 – Nov 2024

- Won HackTX 2024** by developing PrimeTime, an onboard productivity optimization app using multimodal LLMs running on Intel AI PC NPUs to classify productive work and improve time management
- Built a real-time AI dashboard with Python usage tracking, Next.js frontend, and Redis caching, enabling instant productivity analytics and automated application categorization with **sub 200ms response times**

TECHNICAL SKILLS

Languages: Python, SQL (Postgres), JavaScript, HTML/CSS, Bash

Tools: AWS, Linux, Nmap, Git, ServiceNow, SailPoint, Workiva, Tableau, MS Office

Frameworks/Standards/Practices: NIST CSF, ISO 27001, NIST 800-53, SOC 2, SOX, OSI Model
