EDUCATION

The University of Texas at Dallas

Expected Graduation: Dec 2027

Bachelor of Science in Information Technology Systems (Cybersecurity Management)

Bachelor of Science in Finance (Risk Management and Cybersecurity)

GPA: 3.65/4.00

Relevant Coursework: Risk Systems and Theories, Network and Information Security, Cybersecurity Governance, Risk Analytics, Cybersecurity Risk Management, Programming with Python, Cloud Computing with AWS

EXPERIENCE

Cybersecurity GRC Engineer Intern

May 2026 – August 2026

Cloudflare

Austin, TX

- Engineered a scalable GRC automation platform to intake customer security questionnaires and generate responses using semantic retrieval and approved security content, speeding up questionnaire processing time by **~5x**
- Utilized **AI-driven agents** to triage questionnaires, escalating low-confidence and incomplete answers for review
- Built a metrics dashboard tracking answer coverage, confidence scoring, and framework distributions (**FedRAMP, SOC 2, NIST 800-53**), providing upper management insight into potential knowledge base improvements
- Implemented an evidence register to organize control evidence and supporting links across **Jira** and internal wikis

Cybersecurity GRC Analyst Intern

May 2025 – Aug 2025

Talen Energy

Houston, TX

- Integrated SailPoint IdentityNow with Okta via **SAML SSO**, automating user access reviews for **2,500+** users
- Reduced phishing susceptibility by **7%** in 2 months through ZenGuide, strengthening security awareness
- Strengthened post-IPO **IT SOX compliance** by collecting and validating control evidence in ServiceNow, supporting walkthroughs, and managing documentation in Workiva

Data Analyst

Aug 2024 – Present

Dallas Formula Racing

Richardson, TX

- Analyzed, cleaned, and visualized vehicle dynamics data (CSVs, CAN Bus logs) using **Plotly** and **Pandas** to simplify metrics for engineers and support performance improvements
- Mentored new analysts on **Python**, data analysis, and collaborative skills, helping them support team projects

LEADERSHIP

Experience Officer

Jan 2025 – Present

Association for Computing Machinery (ACM)

Richardson, TX

- Leading initiatives to improve the ACM Mentor Program experience for **130+** participants each semester through feedback systems, event coordination, and resource development
- Led **5+** career development workshops ranging from resume building to interview preparation for **30+** mentees

PROJECTS

Network Exposure Analysis Tool | EC2, S3, DynamoDB, Nmap, Flask

Mar 2025 – Apr 2025

- Built a scalable full-stack network exposure scanner on **AWS (EC2, S3, DynamoDB)**, enabling users to initiate and monitor real-time network scans through a web interface
- Implemented **Nmap** for asynchronous scanning, identifying open ports to enhance security insights
- Developed a **Flask API** with Gunicorn and Nginx, using *systemd* for background management and high reliability

Productivity Analytics Platform | Python, Next.js, Redis, OpenVINO

Nov 2024 – Nov 2024

- Won HackTX 2024** by developing PrimeTime, an onboard productivity optimization app using multimodal LLMs running on Intel AI PC NPUs to classify productive work and improve time management
- Built a real-time AI dashboard with Python usage tracking, Next.js frontend, and Redis caching, enabling instant productivity analytics and automated application categorization with **sub 200ms response times**

TECHNICAL SKILLS

Languages: Python, SQL (Postgres), JavaScript, HTML/CSS, Bash

Tools: AWS, Linux, Nmap, Git, ServiceNow, SailPoint, Workiva, Tableau, Power BI, MS Office

Frameworks/Standards: NIST CSF, ISO 27001, NIST 800-53, SOC 2, SOX, OSI Model
